

TESLA Technology Collaboration (TTC) Meeting

December 1-4, 2015

SLAC National Accelerator Laboratory

Kavli Auditorium & Building 48 (Research Office Building),
Redwood Conference Rooms A, B, C, D

<https://conf-slac.stanford.edu/tesla-2015/content/welcome>

This is the team who developed the superconducting RF cavities, cryomodules, and etc we plan to use here at SLAC. Indeed their most recent focus has been on LCLS-II.

All employees are invited to attend. Please register through the website. This is an extraordinary group and the meeting promises to be quite remarkable!
